## MOBILE DEVICES COMPANY

A leading provider of technology, solutions, tools & hardware products for the connected car

### We keep working to be even better

Mobile Devices is a French company based in Paris that specializes in the design and the development of location-based solutions and telematics since 2002.

Constantly evolving, Mobile Devices seeks to regularly renew its line of black boxes and adapt its platform to best meet the specific needs of each vertical and imposes itself today as a must on the international telematics market with more than 1000 projects worldwide

The objective of Mobile Devices is to provide the most reliable and most comprehensive solution to each telematics businesses by offering the devices, the Server Platform, SDK and application store.

**1000+**

projects  
worldwide

**14 years**

dedicated to  
Connected Car

**100 %**

In-house  
design

**1+ Million**

of devices  
deployed

### 14 years of experience in building telematics devices and technologies

Thanks to the constant re-invention of our product range and our refusal to deal with a substandard product at the cost of having to redesign a new product from scratch, we can now say that our technology is ultra reliable and our service solution on a par with the leading brands.

The main objective of our development work is to create innovative solutions with the shortest time to market. We want to take care of all the embedded programming and the tricky features, so that users can focus on their core business: providing services.

### Unique approach for all car telematics verticals

Develop & deploy a global telematics platform with revenue sharing business model, for all connected vehicles applications.

- Addressing All verticals world wide
- Developing a complete portfolio of devices for every vertical market
- All devices sharing the same technology
- Developing a versatile, scalable and very competitive service provisioning & execution infrastructure (CloudConnect)
- Selling to all the vertical players : TSPs are vertical technical integrators selling to regional & niche markets
